Town of Hilton Head Island Minutes of the Design Review Board Meeting August 28, 2018 at 1:15 p.m. Benjamin M. Racusin Council Chambers

Board Members Present: Chairman Dale Strecker, Vice Chairman Michael Gentemann, Cathy

Foss, Debbie Remke, Brian Witmer, Kyle Theodore

Board Members Excused: Ron Hoffman

Town Council Present: None

Town Staff Present: Chris Darnell, Urban Designer; Teresa Haley, Senior Administrative Assistant

1. Call to Order

Chairman Strecker called the meeting to order at 1:15 p.m.

2. Roll Call - See as noted above.

3. Freedom of Information Act Compliance

The Town has met all Freedom of Information Act requirements for this meeting.

4. Approval of the Agenda

Mr. Darnell requested the agenda be amended to remove New Business items "Hargray Building, DRB-001925-2018" and "6 Lagoon Road, DRB-001931-2018" as each project was withdrawn by their respective applicant prior to the meeting. The Board approved the agenda as amended by general consent.

5. Approval of Minutes – August 14, 2018

The Board approved the minutes of the August 14, 2018 meeting by general consent.

6. New Business

A. Alteration/Addition

• Lighthouse Drive Monopole, DRB-001908-2018

Mr. Darnell introduced the project and described its location. Mr. Darnell presented an in depth narrative of the project as provided in the Board's packet. Staff recommends approval with the following condition:

1. The monopole structure shall be painted light blue to blend with the sky.

Chairman Strecker asked if the applicant would like to add to Staff's narrative. The applicant indicated the project is a temporary solution to maintain communications for the cellular carriers while the water tower is being painted. The applicant proposed to paint the temporary structure "Fountain Blue" to match the water tower.

Chairman Strecker requested comments from the Board. The Board agreed with Staff's recommendation. The Board noted the existing tower has a green base and therefore asked for

clarification that the entire structure will be painted the light blue color. The applicant confirmed the entire structure will be painted the "Fountain Blue" color.

Ms. Theodore made a motion to approve DRB-001908-2018 with the following condition:

1. The temporary monopole structure shall be painted "Fountain Blue" in its entirety.

Ms. Foss seconded. The motion passed with a vote of 6-0-0.

• Sea Pines Drive Monopole, DRB-001909-2018

Mr. Darnell introduced the project and described its location. Mr. Darnell presented an in depth narrative of the project as provided in the Board's packet. Staff recommends approval with the following conditions:

- 1. The monopole structure shall be painted light blue or "Fountain Blue" to match the adjacent existing water tower.
- 2. Any understory landscaping shall be replaced once the monopole is removed.

Chairman Strecker asked if the applicant would like to add to Staff's narrative. The applicant indicated the tower will not be on South Island PSD property, therefore, an agreement with the Sea Pines CSA is in place for a temporary construction easement to place the pole on their property.

Chairman Strecker requested comments from the Board. The Board and the applicant agreed with Staff's recommendation.

Ms. Theodore made a motion to approve DRB-001931-2018 with the following conditions:

- 1. The temporary monopole structure shall be painted "Fountain Blue" in its entirety.
- 2. Any landscape materials damaged during the monopole placement shall be replaced at the time such monopole is removed.

Ms. Foss seconded. The motion passed with a vote of 6-0-0.

7. Appearance by Citizens – None

8. Board Business

A. Revision to the DRB Rules of Procedure regarding Board attendance

Vice Chairman Gentemann moved to approve the amendment to Article III, Section 1, Paragraph 4 as submitted. Ms. Theodore seconded. The motion passed with a vote of 6-0-0.

9. Staff Report

Mr. Darnell reported the Minor Corridor approvals since the last Board meeting.

10. Adjournment

The meeting was adjourned at 1:31 p.m.

Project: Exterior Improvements to 6 Lagoon Road, Hilton Head Island, South Carolina

Please accept this design information for the proposed exterior improvements to the existing structure at 6 Lagoon Road. This building is part of Coligny Plaza.

PROJECT DESCRIPTION

This project seeks to provide a new second level balcony and a new trellis along the Lagoon Road side of the building, replacing the dated and unsightly canvas canopy. The balcony will serve two tenant suites on the north side of the building and provide a location for new signage for the first floor tenant that will be submitted under a later application.

Additionally, the project will provide two second story porches for the tenants on the south side of the building, also provided with matching trellises.

Landscaping will also be replaced for the development to accommodate the new alterations.

Thank you for your consideration.

Sincerely,

Steven G. Stowers, AIA, LEED AP

Note from Staff,

This application includes a request for DRB approval of the asphalt shingle that has recently been added to the building replacing the wood shingles (see submission photos). This shingle matches other shingles at Colignly Plaza.

HALO LED ICAT HOUSING for NEW CONSTRUCTION

The H750ICAT is a dedicated LED new construction housing to be used with designated HALO LED modules. The H750ICAT is designed for insulated ceilings and can be in direct contact with ceiling insulation*. This AIRTITE housing design prevents airflow between conditioned and unconditioned spaces and saves on both heating and air conditioning costs. The LED connector system provides high efficacy code compliance when used with designated HALO LED modules and trims.

DESIGN FEATURES

Housings

Aluminum construction for greater heat dissipation. H750 ICAT housing is gasketed to prevent airflow from heated or air conditioned spaces.

Plaster Frame

Galvanized steel frame. Housing adjusts in plaster frame to accommodate up to 1" ceiling thickness. Regressed locking screw for securing hanger bars. Cutouts included for easily crimping hanger bars in position

Slide-N-Side™ Junction Box

- Positioned to accommodate straight conduit runs.
- Seven ½" trade size conduit knockouts with true pry-out slots.
- Slide-N-Side wire traps allow non metallic sheathed cable to be installed without tools and without removing knockouts.
- Allows wiring connections to be made outside the box.
- Simply insert the cable directly into the trap after connections are made.
- Accommodates the following standard non-metallic sheathed cable type:
- U.S. #14/2, #14/3, #12/2, #12/3
- Canada: #14/2, #14/3, #12/2

GOT NAIL! Pass -N-Thru™ Bar Hangers

Bar Hanger features include

- Pre-installed nail easily installs in regular lumber, engineered lumber and laminated beams.
- Safety and Guidance system prevents snagging, ensures smooth, straight nail penetration and allows bar hangers to be easily removed if necessary
- Automatic leveling flange aligns the housing and allows holding the housing in place with one hand while driving nails.
- Housing can be positioned at any point within 24" joist spans
- Score lines allow tool-free shortening for 12" joists and bar hangers do not need to be removed for shortening.
- Bar hangers may be repositioned 90° on plaster frame
- Integral T-bar clip snaps onto T-bars – no additional clips are required.

LED Module Connection

Halo LED modules simply install with a plug-in 120V-277V rated line voltage wiring connector (UL and CSA Listed Luminaire Disconnect). This non-screw-base connection preserves the high efficacy rating and prevents use of low efficacy incandescent sources (see LED Module specifications).

Caution

Connection is rated for 120V and 277V input. Installer must verify LED module voltage is compatible with the applicable voltage input. If uncertain, consult a qualified electrician.

Labels

- UL/cUL Listed 1598 Luminaire
- CE Marking "Conformité Européene" conformity with the Council of European Communities Directives, meeting internationally recognized compliance when used with ML56 Series LED modules
- UL/cUL Listed for Feed Through
- UL/cUL Listed for Damp Location
- UL/cUL Listed for Wet Location with select trims
- UL/cUL Listed for direct contact with insulation and combustible material*
- Rated for 20W maximum

Qualification

May be used with qualified Halo LED modules and designated trims for High Efficacy Luminaire Compliance:

- State of California Title 24
- International Energy Conservation Code (IECC)
- Washington State Energy Code
- New York State Energy Conservation Construction Code
 AIR-TITE™ Compliant
- Certified under ASTM-E283 standard for air-tight construction

VILLAGE HOUSE – NARRATIVE

Village House is currently looking to renovate their property by updating the exterior of their existing building.

The goal of this renovation is to refresh the current appearance and bring the building up to date. Village

House has selected J. Banks Design Group to design and coordinate the exterior finish selections. J. Banks

has proposed painting the exterior of the building, updating the existing columns of the entry and installing a

new metal roof on the updated porte-cochere. All of these proposed items will enhance the appearance

of Village House as well as Wimbledon Court.

Hilton Head Port Royal Resort

Hilton Head Island, SC

Final DRB Project Narrative

August 28, 2018

HH Island Acquisition Partners LLC is proposing to construct a new resort facility to replace the previous development known as The Port Royal Racquet Club Tract (parcel 4 – Wimbledon Court) along Folly Field Road and adjacent to Fiddler's Cove, The Lyons and Ocean Palms Villas. The existing property consists of approximately 8.4 acres of land with remnants of the Racquet Club remaining on the site including portions of Wimbledon Court, existing parking spaces, an existing pro-shop/club building, and tennis courts.

HH Island Acquisition Partners is looking to redevelop the property into a signature destination resort that will be operated by Bluegreen Vacations. The proposed resort will incorporate island character within the site plan and architecture. The proposed building composition will consist of (3) four story and (4) three story residential structures. Total units proposed for the resort will be 132 units with a mixture of 1, 2, and 3 bedrooms. The scale of these structures is in keeping with the adjacent existing developments and appropriate for the surrounding neighborhoods.

The development will be constructed in two phases. The first phase will include the clubhouse, maintenance and laundry facility, guest amenities such as a resort pool and spa, pool house with restrooms and showers, covered pool pavilion, outdoor grill and pizza oven, tot lot, four (4) residential structures along the entry drive. The second phase will include the final three (3) residential structures, the remainder of the entry drive and sidewalks. Some additional site features include well landscaped walking paths and common areas that connect to the Town's bike path. Bicycle parking is provided at each building and adjacent to the clubhouse.

There are two significant trees (Live Oak and Cork Oak) located on the property. These trees are being preserved with less than 20% of each tree's surveyed rootzone impacted. There are several areas of existing stands of oaks, pines, and palms throughout the development to be preserved. The proposed detailed planting plan is to utilize mostly native plant material and preserve as many trees and existing vegetation as possible.

The main entry to the site will be offset to the south of the existing entry drive of the Island Club on Folly Field Dr by approximately 465 feet. Access to the site will be via two entrances on Folly Field Dr. The main entry provides a strong sense of arrival for guests with views towards the clubhouse and tabby plaza. The entry will have landscaping, signage, and entry walls as appropriate. There will be pedestrian connectivity including a pathway that connects Wimbledon Drive to Folly Field Road.

Most of the site is a free-draining sandy soil with elevations ranging between 9' and 12'. The proposed residential, amenity and maintenance buildings are set to have a finish floor elevation set at 14.1' or greater. All guest / timeshare visitor parking is located underneath the raised residential structures. Parking has been provided at the appropriate rate for 1, 2, and 3 bedroom units per LMO requirements. The number of vehicle parking spaces to be provided is 167 spaces.

Final DRB – Responses

August 28, 2018

Previous Conceptual DRB was approved with specific conditions listed below. See responses or clarifications in Blue.

- 1. Light sources shall not exceed 300k. The lighting plan has been updated accordingly.
- 2. The light plan exceeds the average foot candle requirement and revisions need to be made. The lighting plan has been updated accordingly.
- 3. Proved a color board for review at the final submittal. In addition to updated site details that convey all the visible surfaces, a materials and site furnishings board has been provided. An architectural material and color board will be provided at the DRB meeting as well.
- 4. Eliminate the walk between Buildings 6 and 7 to keep out of the Island Club Corridor. Walk has been eliminated.
- 5. Submit an alternate color to the white color paint. Alternate color selections have been provided.
- 6. Consider wider pedestrian paths for the beach access paths provided. The main pedestrian promenade that connects the buildings to the amenity and Islanders Beach Park has been expanded to 8' wide wherever space allows.
- 7. Submit all final samples including sample of roof materials. In addition to updated site details that convey all the visible surfaces, a materials and site furnishings board has been provided. An architectural material and color board will be provided at the DRB meeting as well.
- 8. Show accurate foundations, fill heights, etc. on the maintenance building, the clubhouse, and laundry facility with regard to finish grade. The area around the pool and clubhouse has been carefully studied. An additional tree and limb survey of the two specimen trees was performed. Refer to sheet C4.3 for a detailed grading plan that shows the finished floor of the surrounding buildings and any grade change.
- 9. Include all ramps and changes in grade that will affect the finished floor height in relationship to grade. Refer to sheet C4.3 for a detailed grading plan that shows the finished floor of the surrounding buildings and any grade change and site details for ramps at the entry.
- 10. Consider a lower scale for the buildings. For instance, three stories in lieu of four stores on the four-story buildings. Building massing and overall scale has been carefully studied by the design team. Building sizes and heights vary throughout the site. Additional plant material is being proposed along Folly Field Drive.
- 11. Provide a streetscape elevation along Folly Field Road that shows all buildings in relationship to each other. A streetscape elevation has been provided along Folly Field Road. Additional plant material has been proposed above and beyond the required buffer requirements.
- 12. Eliminate the gingerbread millwork. Gingerbread millwork has been eliminated.
- 13. Increase plant material size in the buffers. Plant material has been substantially increased in the buffer and within the 40' setback off of Folly Field Road in order to visually soften the building elevations. 6" caliper Live Oaks are being proposed for all perimeter plantings in addition to upsized evergreen plantings of Southern Magnolias, Red Cedars, Pines, Dahoon Hollies, Wax Myrtles, and Upright Yaupon Hollies.
- 14. Any and all other submittal requirements are met. Additional information has been provided with relevant cut sheets and callouts. The overall submittal package includes over 200 pages. Any additional detail requested can be provided.
